

Content-Based Neighborhood Recommendation System

A recommendation system for neighborhoods may improve populace satisfaction

- ▶ Nowadays neighborhoods are an important factor that may raise or decrease the likelihood of a person/family to move to a specific place.
- ▶ Satisfaction has been repeatedly linked to efficiency and prosperity, helping people to find suitable neighborhoods can help improve the city.
- ▶ Overtime this may give valuable information of what venues drive customer satisfaction within a neighborhood.
- ▶ Real estate agents would be interested in the information this recommendation system will provide to narrow their search.
- ▶ Developing an app with this type of system that could also be economically interesting.
